Can you eat that?!?!

Do you like ice cream, cakes, pears or ham? Or is your favourite food, spiders, worms or monkeys?

We eat different things in various parts of the world. In fact, insects can be bought as a snack in Asia. The insects are blended with sugar to make bars.

In Mexico, people eat eggs from ants. You can fry the eggs in butter and eat them like tacos.

In France, many people enjoy eating frogs. The legs of a frog are considered to be a delicacy.

If you had lived in Colombia, you might eat large ants for breakfast.

And finally! If you travel to Peru, you can order a guinea pig at the restaurant. It will be cooked on a stick and served with a salad.

Are you hungry?
